ABOUT US

Since 2015

SKINTECH
For all your dermatological needs

Private Practices

Private Patients

Hospitals

Medical Supply Companies

SkinTECH began with a single purpose: to bridge the gap between cutting-edge medical technology and the everyday needs of dermatology practices in South Africa.

What started as a focused distributor of acne patches, dermatoscopes and phototherapy devices evolved into a trusted medical supply partner for professionals across dermatology, plastic surgery and general practice. Our range grew - but so did our reputation for efficiency, reliability and approachability.

Our team works hard to keep communication simple, lead times short and pricing competitive - without compromising on quality or service.

MEDIPATCH

MEDIPATCH ULTRA

A transparent pimple plaster for acne & small wounds.

36 patches per box (12mm x 12 units and 8mm x 24 units)

4 patches per box (20mm x 50mm)

Nappi Code 130465

AKNICARE CLEANSER

Works as an antiseptic
with a purifying and soft
exfoliating action.

The Aknicare® range
works together as an
anti-inflammatory and
anti-bacterial. The
products remove dead
skin cells, targets excess
oil production and
reduces inflammation
and redness of pimples.

BEST SELLER

AKNICARE CREAM

A moisturiser for acne prone skin, with hydrating action which prevents skin dryness.

Nappi Code 721291

AKNICARE LOTION

A fast acting, concentrated liquid solution for spot treatment of acne. Can be applied on the skin before Aknicare cream.

Nappi Code 721289

AKNICARE SPRAY

A convenient oil-free fluid for other areas of the body affected by acne, such as chest, back and arms.

Nappi Code 721290

BEST SELLER

VITILIGO

Vitiligo is a chronic skin condition characterized by the loss of pigmentation in certain areas of the skin.

It occurs when melanocytes, the cells responsible for producing melanin (the pigment that gives skin, hair, and eyes their color), are destroyed or stop functioning.

This results in white or depigmented patches on the skin, which can vary in size and shape.

VITIX

Nappi Code 717248

An opaque, non-greasy gel with a slightly granular appearance that can be used in combination with phototherapy which can increase re-pigmentation.

POPULAR COMBO

VITILIGO TREATMENT

VITICOLOR

Nappi Code 717249

Skin camouflage gel designed to give long lasting colour to depigmented areas of the epidermis.

Viticolor combines colouring agents and pigmenting agents (DHA & erythrulose) which provides deeper long lasting colouration.

*Orange undertone.

MIMIQ SKIN CAMOUFLAGE

MiMiQ

Nappi code 142427

DERMAPAL

BEST SELLER

Ideal for spot treatment of vitiligo, eczema and psoriasis of the skin and scalp. Comb attachment serves as distance gauge and assists in parting the hair for better penetration during treatment.

Nappi code 142428

1 SERIES

Offers compact, targeted treatment ideal for areas like hands, feet, arms, or legs. Its sleek design ensures portability and ease of use for home or clinic settings using the touch control pad.

Nappi code 214673

7 SERIES

The 7 series makes full body phototherapy treatment available in clinic locations with limited space or for patients who require home treatments at their convenience.

This is a panel phototherapy unit which treats the full length of the body (front and back).

Treatments are programmed in a few simple keystrokes using the touch pad. Ideal for treatment of extensively affected areas.

A close-up photograph of a person's arm, showing numerous small, glistening sweat droplets on the skin. A soft, white mist or spray is visible on the right side of the arm, partially obscuring the skin. The background is a warm, out-of-focus orange-brown color.

An extremely potent antiperspirant specifically formulated for individuals who experience very severe foot sweating (plantar hyperhidrosis).

9012

BEST SELLER

Dermadry iontophoresis machine is indicated for the treatment of excessive sweating of the hands, feet, and underarms (palmar, plantar, and axillary hyperhidrosis).

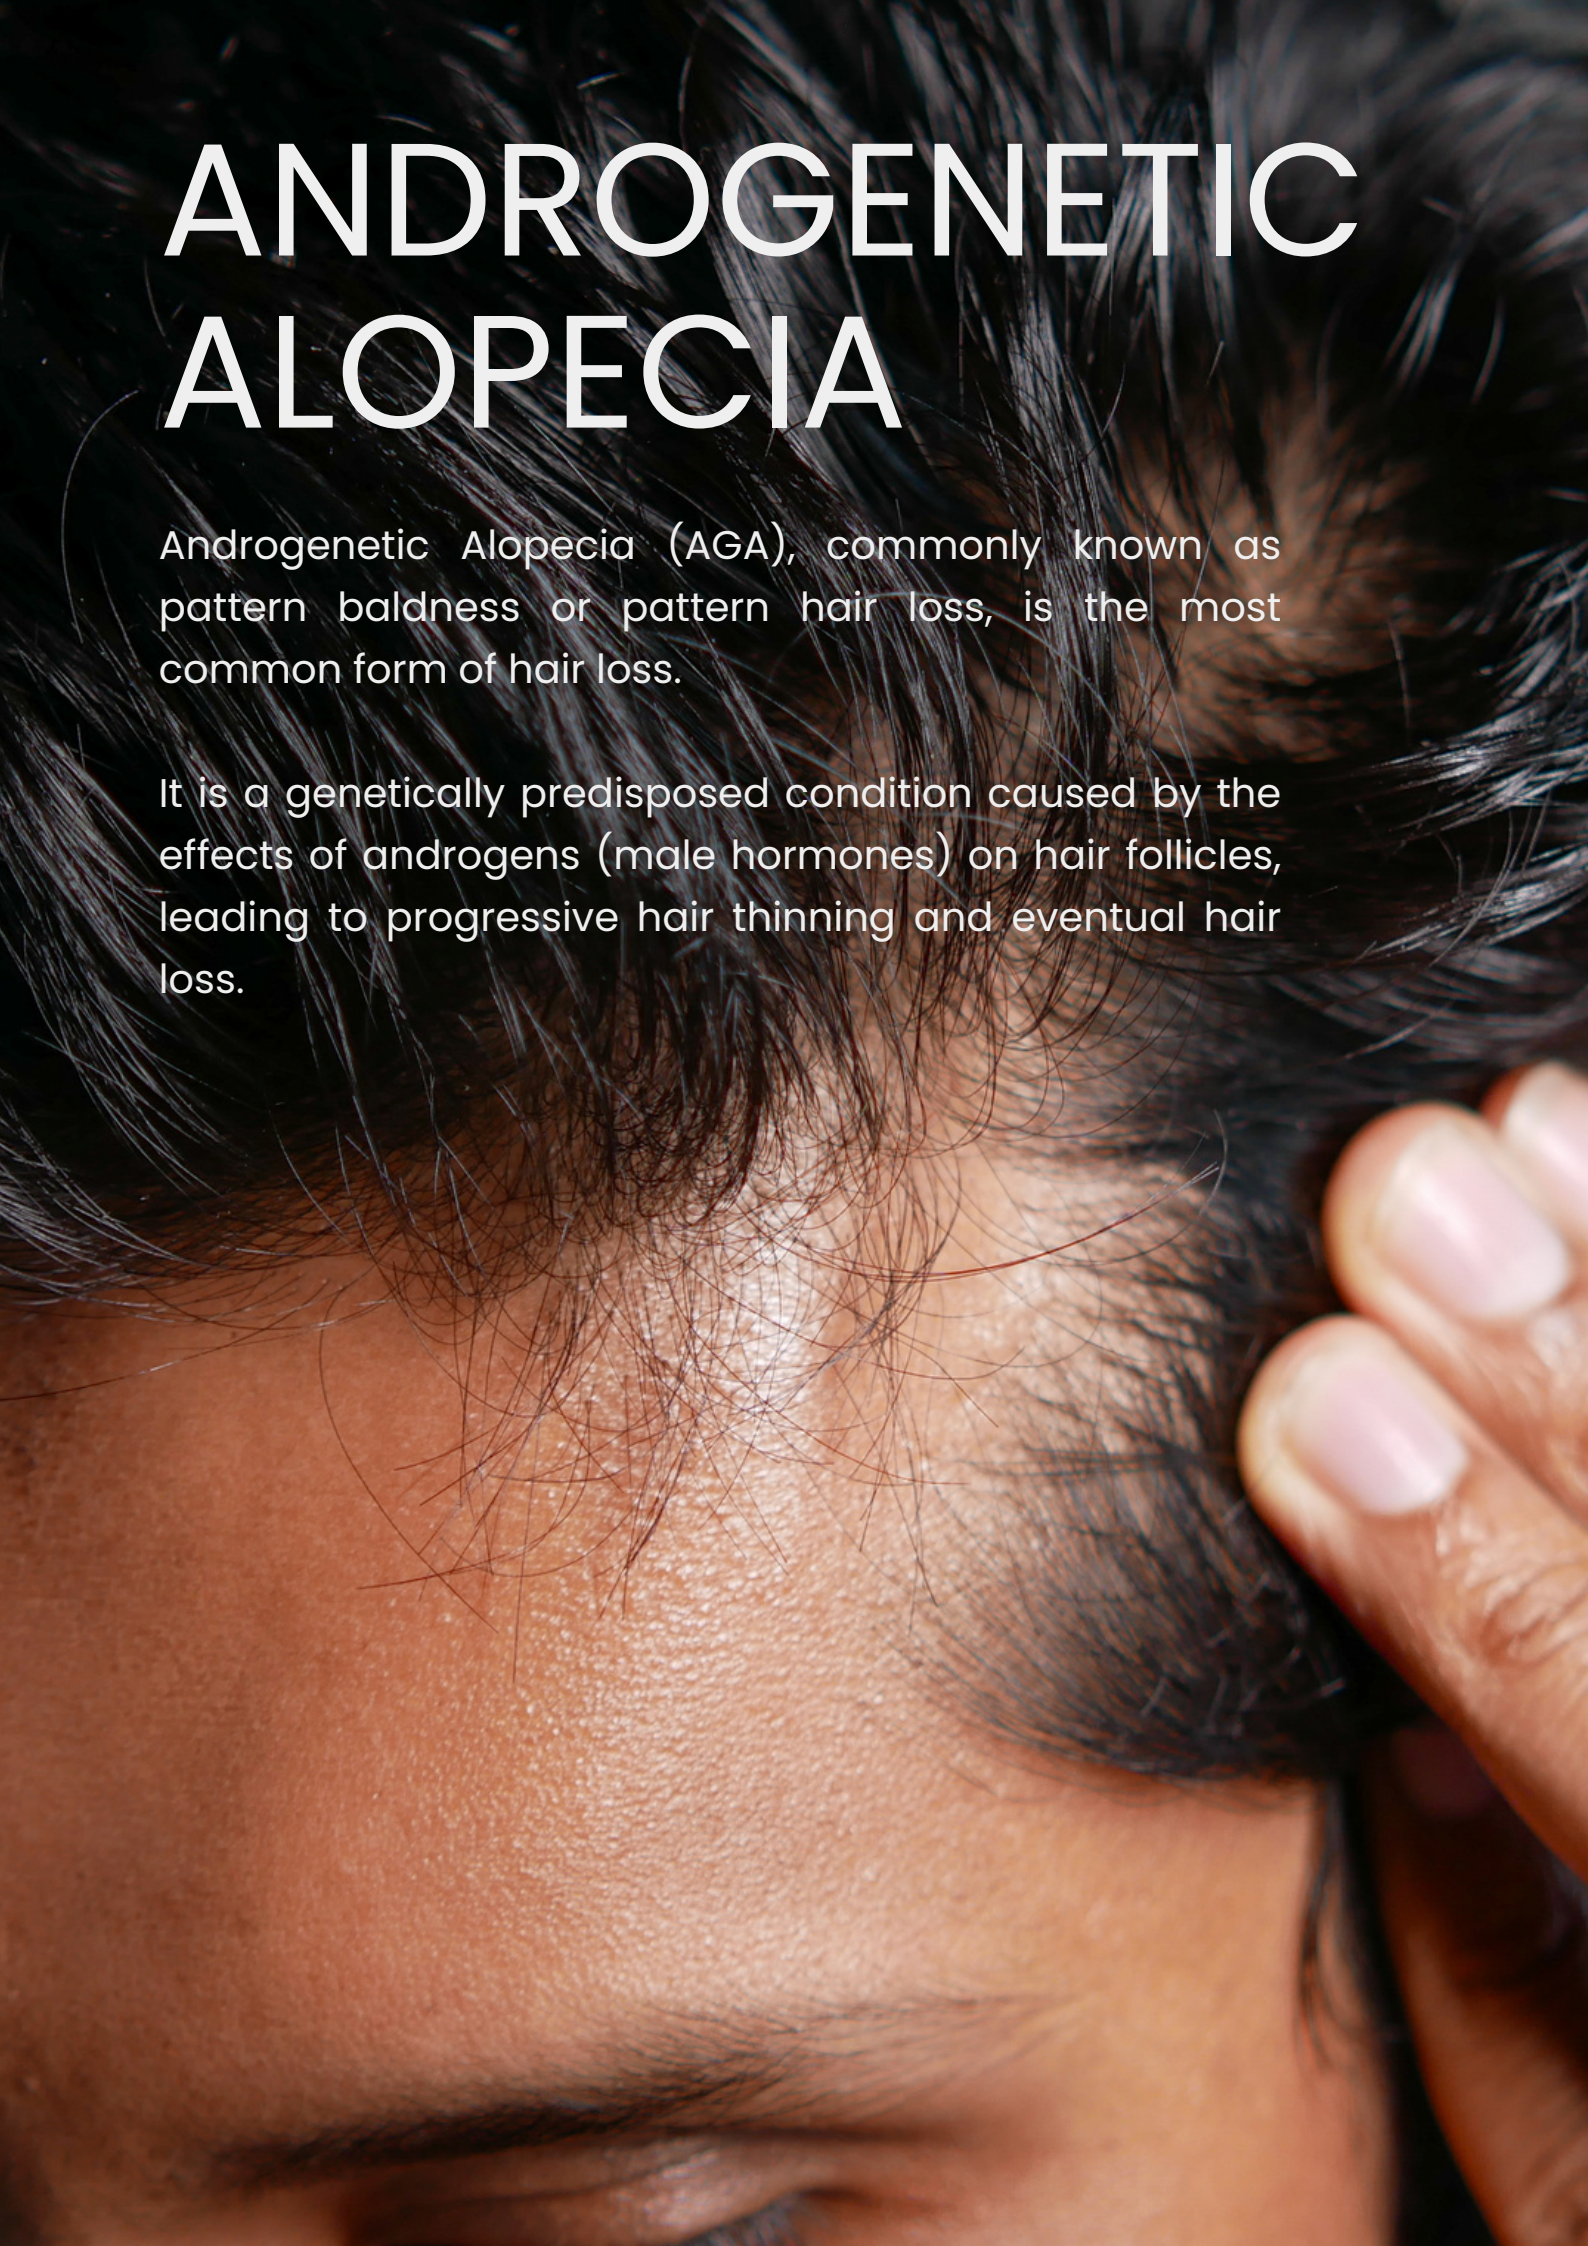

ANDROGENETIC ALOPECIA

Androgenetic Alopecia (AGA), commonly known as pattern baldness or pattern hair loss, is the most common form of hair loss.

It is a genetically predisposed condition caused by the effects of androgens (male hormones) on hair follicles, leading to progressive hair thinning and eventual hair loss.

Low-Level Laser Therapy (LLLT) is a non-invasive and FDA-cleared treatment for androgenetic alopecia (AGA). It uses low-power laser light to stimulate hair growth and slow the progression of hair loss.

The energy from the laser light can help increase blood flow and circulation in the scalp, which can lead to healthier hair follicles.

CHEMOEXFOLIATION
ENERPEEL®

SMARTER PEELS FOR SENSITIVE SKIN

The ENERPEEL® system represents a new generation of medical-grade chemical peels, designed for dermatologists and aesthetic professionals who demand both efficacy and tolerability.

MANDELIC ACID 40%

ENERPEEL® MA 40% is specifically designed for sensitive, vascular, and reactive skin types, including patients with rosacea (erythematous-telangiectatic phase).

It is also suitable for:

- Post-laser treatment (only after full re-epithelialization)
- Year-round refresher peel for uneven skin tone

SALICYLIC ACID 15%

Designed for mild to moderate comedonic and inflammatory acne, ENERPEEL® SA 15% is ideal for use on the face, particularly in early adolescence and on sensitive skin.

ENERPEEL

CHEMICAL PEELS

CHEMICAL PEELS – ENERPEEL

This advanced chemoexfoliation system, expertly formulated to treat specific skin concerns, delivers targeted results. Each peel in the range features advanced carrier technology that improves penetration, reduces surface trauma, and enhances uniformity.

2 X SA15% PEELS & AKNICARE USED TWICE DAILY / 2 MONTHS

MUST HAVE

ICE ROLLER

Used to apply a cold massage to the face, reducing puffiness and inflammation.

MUST HAVE

VIBRATION DEVICE

Used to reduce pain during injections.

PATCH TESTING

CONTACT
DERMATITIS

PATCH TEST KITS

Patch Testing is considered the gold standard for the diagnosis of contact dermatitis.

A range of kits are offered with a variety of haptens to serve your patient needs.

e.g. Bakery, Cosmetic, Epoxy and European Baseline Series

Available on order

APPLICATION TRAY

This is convenient in preparing test series. The device is equipped with a special function to detach and attach the syringe caps. This eliminates contamination of fingers during the dispensing of haptens.

IQ ULTIMATE CHAMBERS

Chambers are water resistant and made of additive-free polyethylene plastic foam with a filter paper incorporated. The rim has an adhesive layer to optimize adhesion to the skin and to eliminate leakage.

IntelliStudio®

The gold standard in automated total body photography and dermoscopy integration.

IMAGING EXCELLENCE FROM

D2

Mole mapping excellence from Canfield Scientific.
Impressive image capture and intuitive lesion tagging.
Sharper. Smarter. Simply next-level.

D200Evo

Fully integrated with DermaGraphix® body mapping software to deliver fast and repeatable lesion management.

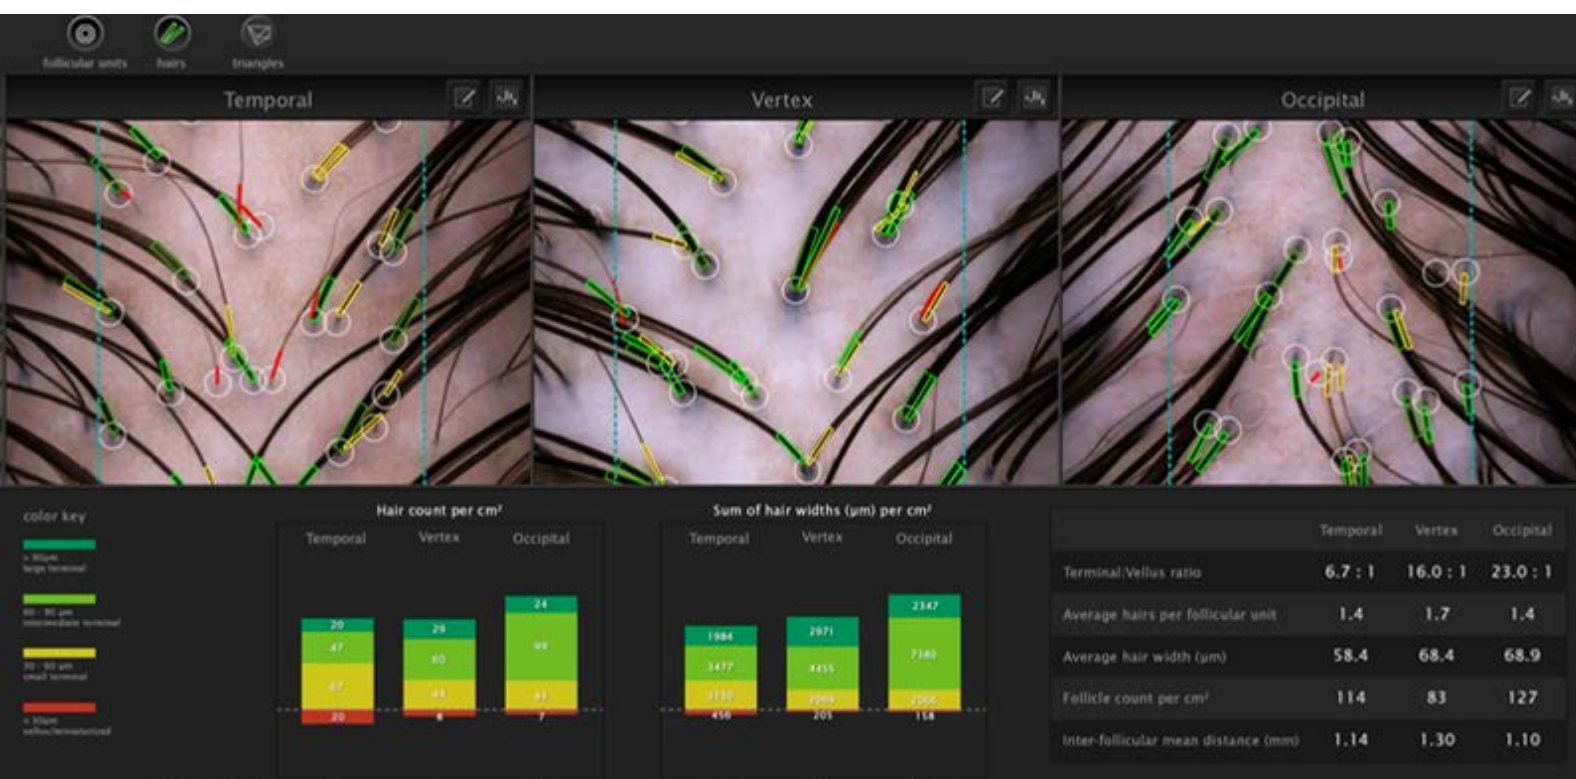

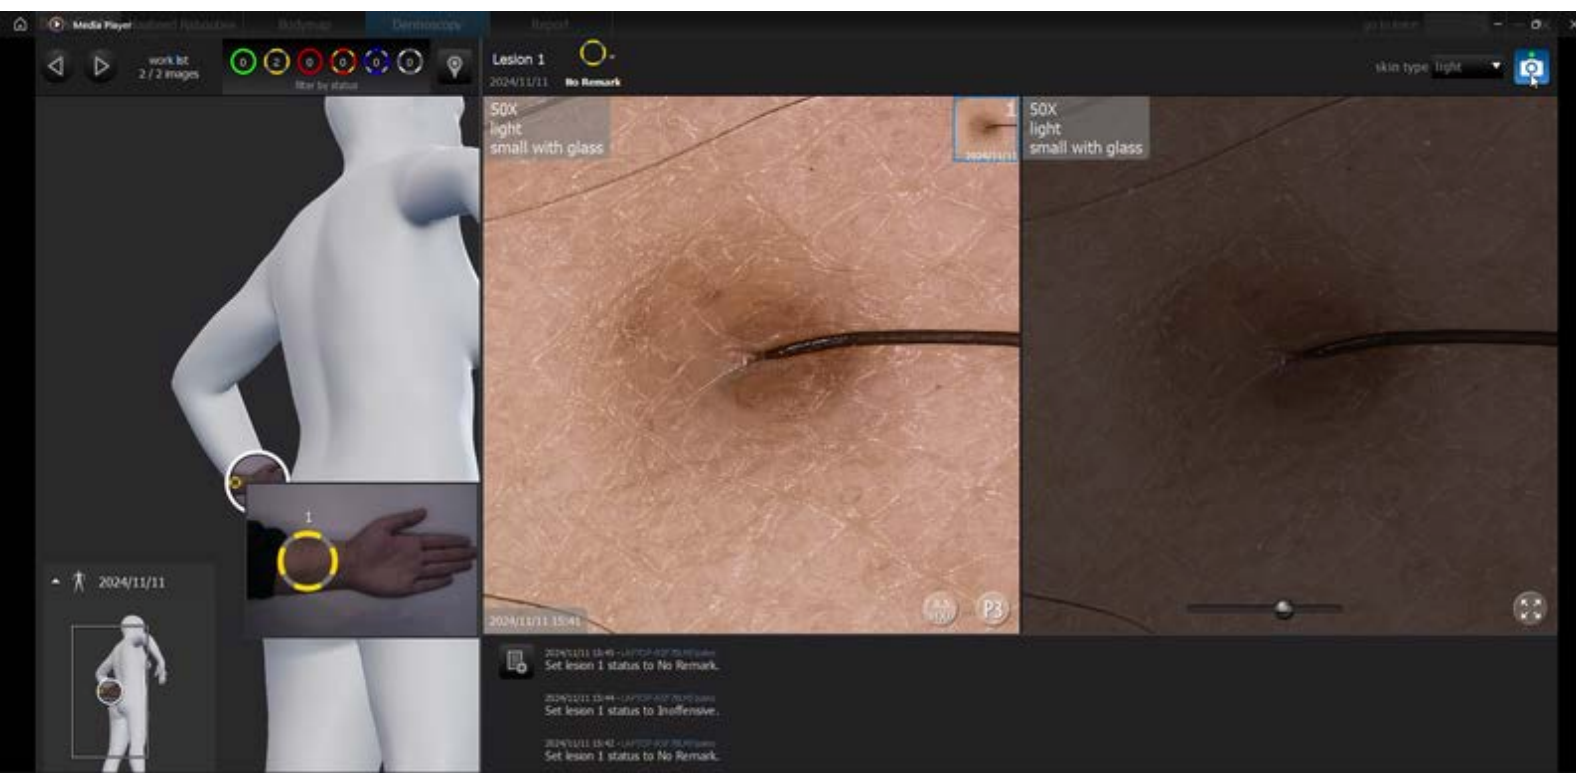

VEOS®

Powerful, pocket-sized, smartphone dermatoscope.
Capture, tag and examine lesions with the
DermaGraphix app* or as a wireless option for your
DermaGraphix system.

*Subscription based

LUMINIS
DERMOSCOPY REDEFINED

A dermatologist with blonde hair, wearing a white lab coat, is using a handheld medical device on a patient's arm. The patient is a woman with blonde hair, wearing a white top. The device has a circular lens at the top and a handle with a small display and buttons. The background is a plain, light color.

OPTIMA 3 IN 1
FULL SPECTRUM SKIN EXAMINATION

UV SERIES

The most ideal solution for in-clinic phototherapy.
A surround body cabinet for full body treatments.
Cost effective with a high rate of success.
Treatments are brief and efficient.

PHOTOTHERAPY

Phototherapy, is a treatment that uses specific wavelengths of light to treat various medical and dermatological conditions. Narrowband UVB (NB-UVB) uses a specific wavelength (311–312 nm) and is widely used for its effectiveness and lower risk of side effects.
